# Shaping the Future of Work, One Workspace at a Time

## **Gaurrav Mozar**

*Founder & Principal Consultant,  
GM Design Pvt. Ltd.*

**G**aurrav Mozar, Founder and Principal Consultant of GM Design Pvt. Ltd., has been working to create meaningful workspaces that respond to people's needs and fuel inspiration. Gaining global experience across corporate interiors, luxury hospitality, residential, and retail design for the past two decades, Gaurrav laid the foundation of GM Design in 2008, with a clear conviction of transforming workspaces into ecosystems that not only function but also inspire. Today, with over 25 million sq. ft. of workspace transformed and 750,000+ users impacted, GM Design stands as a future-focused design-build firm redefining what workplaces mean to businesses and people alike.

## Building Workspaces to create an IMPACT

At the core of GM Design's practice lies the philosophy of "IMPACT." The firm believes in creating work environments that promote productivity, culture, and well-being of the workers.

"IMPACT" stands for being:

- **Innovative** - Pushing creative and technical boundaries to deliver future-focused spaces.
- **Modern** - Ensuring relevance to evolving business and cultural contexts.
- **Practical** - Translating vision into usable, efficient environments.
- **Adaptive** - Equipping workspaces to be flexible with shifting business needs.
- **Collaborative** - Fostering connectivity and teamwork through spatial planning.
- **Transformative** - Creating lasting value for both organizations and their people.

These key principles serve as guiding anchors across the lifecycle of every project at GM Desiign, right from the concept stage to the final handover.

### Designing Workspaces as Living Ecosystems

At GM Desiign, every project begins by understanding how teams work, communicate, and align with the culture and goals of the organization. With this insight, the design team crafts solutions that are custom-made for the specific requirements of the project, balancing functionality with technology.

Gaurrav firmly believes that a workspace is more like an ecosystem. It must cater to diverse needs of employees, right from quiet zones for deep focus to open hubs for collaboration, breakout spaces for creativity, and wellness areas that promote balance. Spaces need to seamlessly reflect the client's brand while also elevating employee experience. This approach has allowed GM Desiign to design environments that are as strategic as they are aesthetic, becoming spaces that work for people and the business.

### Execution, Management, and Precision

GM Desiign bridges the gap between design vision and detailed execution with utmost precision. The firm's in-house management and manufacturing teams ensure that every project is executed with rigour and accuracy. Right till the date of handover, the team manages timelines, budgets, and quality benchmarks with absolute clarity.

The use of in-house fabrication facilities further strengthens delivery, enabling seamless control over design customisation and material quality. GM Desiign's project managers maintain transparent communication with clients, while a structured quality framework ensures that no detail is overlooked. Whether it's a single corporate headquarters or multi-site rollouts, the firm brings consistency, speed, and reliability to every project.

### Workspaces that Evolve with Time

The dynamism of work culture is shaped by global events, technology, and human aspirations. Gaurrav has been at the forefront of observing and responding to these shifts. From the rise

of hybrid work to the growing emphasis on wellness, sustainability, and AI-driven tools, he believes that workspaces must evolve in step with the changing rhythm of work.

This means designing offices that are spaces where hybrid meetings feel natural, biophilia and natural light reduce stress, ergonomics improve well-being, and sustainable strategies, like locally sourced materials and clean energy solutions, become standard

[www.iworldmedia21.com](http://www.iworldmedia21.com)

practice. For GM Design, the focus is always on future-readiness, creating spaces that empower employees today while equipping organisations for tomorrow's change.

#### **The Vision Ahead**

With a national presence in Mumbai,

Pune, Bengaluru, and Hyderabad, and an international presence in the UK, USA, and Dubai, GM Design has delivered over 500 projects across varied types of industries, including startups, corporates, and global enterprises, earning a reputation for high-performance workspaces and a 98% client satisfaction rate.

Beyond the numbers, what defines GM Design is its core vision to transform conventional offices into intelligent, responsive, and human-centric work environments. For Gaurav, it is not just about building for today, it is about anticipating and being prepared for tomorrow. He strongly believes that a workspace needs to energize people and prepare organizations for what's next.

With the philosophy of IMPACT at its core and a strong commitment to innovation, GM Design is leading the way in shaping the future of work, one workspace at a time.
